Lung cancer staging

Stefan Diederich^{1*}, Matthijs Oudkerk^{2*}

From International Cancer Imaging Society Meeting and 15th Annual Teaching Course (ICIS 2015)
London, UK. 5-7 October 2015

During this interactive hands-on workshop the participants will view complete imaging examinations (CT of chest, abdomen, brain, MRI of brain, chest, adrenals, musculoskeletal system, PET-CT, bone scintigraphy etc.) on workstations in a clinical routine setting and discuss findings with two tutors.

Cases will include those with typical findings as well as pitfalls and problems.

Particular attention will be paid to the correct assessment of findings that alter the therapeutic concepts [1-3].

Authors' details
